COMPUTER GENERATED REPORT PRINTING
METHOD AND SYSTEM

5   ABSTRACT OF THE DISCLOSURE

A system for implementing a method for generating and printing a report is disclosed. The system generates the report to include a header section representing information, a parts section listing line items, and a footer section representing information. The system prints a first page of the

10   report including the header section, a first parts subsection, and the footer section. The first parts subsection lists a quantity of line items that is less than or equal to a number that is a function of the size of the header section and the footer section. The system prints any additional pages of the report to include a header subsection, subsequent parts subsection, and a footer

15   subsection. The header subsection represents a portion of the information represented by the header section, and the footer subsection represents a portion of the information represented by the footer section. The subsequent parts subsection(s) lists a quantity of line items that is less than or equal to a number that is a function of the size of the header subsection and the footer

20   subsection.
